

WHAT'S NEW?

In the new addition, cafeteria ceiling panels are being installed along with new light fixtures. Finishes are being installed throughout the addition, and the renovation will be following shortly after. As part of the renovation, auditorium carpet has been installed and seats will be re-installed during the first week of August. Both the existing building and new addition will receive new terrazzo by mid-August. Exterior site work continues as crews prepare for pavement installation and landscaping in the coming weeks.

As construction nears completion ahead of the new school year, the District is excited to announce it will be hosting a **Ribbon Cutting & Dedication Ceremony on September 6, from 4:15-6:15 PM.** Optional, self-guided tours will follow the ceremony to allow community members, staff, and students to see the new and renovated spaces. The District cannot thank the community enough for its continued support and looks forward to welcoming you into the new spaces soon. Please keep an eye out for more details in the coming weeks.

See below and the following page for progress photos.
